NoiseAid

Gather evidence to help prioritise your noise nuisance cases

- A simple way for your users to log information about noise sources that are disturbing them

- Gather information that can be used to determine if complaints need to be progressed further

- Can be used on any device with a web browser including laptop & desktop PCs

- Use before or alongside the deployment of a Cirrus Trojan Nuisance Recorder

- Allocate any number of end-users & your team

- Pre-selected noise sources that users can choose from with a simple severity rating

- Secure, encrypted access ensures reliable information can be gathered quickly & easily

- **FREE for Cirrus Trojan Users**

NoiseAid is a web-based application that gives you and your user's quick and simple way to gather information about the noise sources that they are concerned about.

Users can instantly log noise disturbances via any smartphone, tablet, laptop or desktop computer using the simple interface, adding notes when the noise has ended.

Details of the noise sources logged by users are stored directly onto a secure website portal, ready for you to review.

MADE IN BRITAIN

NoiseAid can be setup for any number of end-users with each being allocated a unique, secure PIN that identifies them within the system.

Any number of users can be added to your account allowing different officers to analyse information quickly and easily.

Each user can be setup with the specific noise sources that they are looking to report, which display clearly on the screen for them to select.

All the user has to do is press start, choose the severity of the noise and press stop when the noise ends. They can enter notes if they want to add additional information.
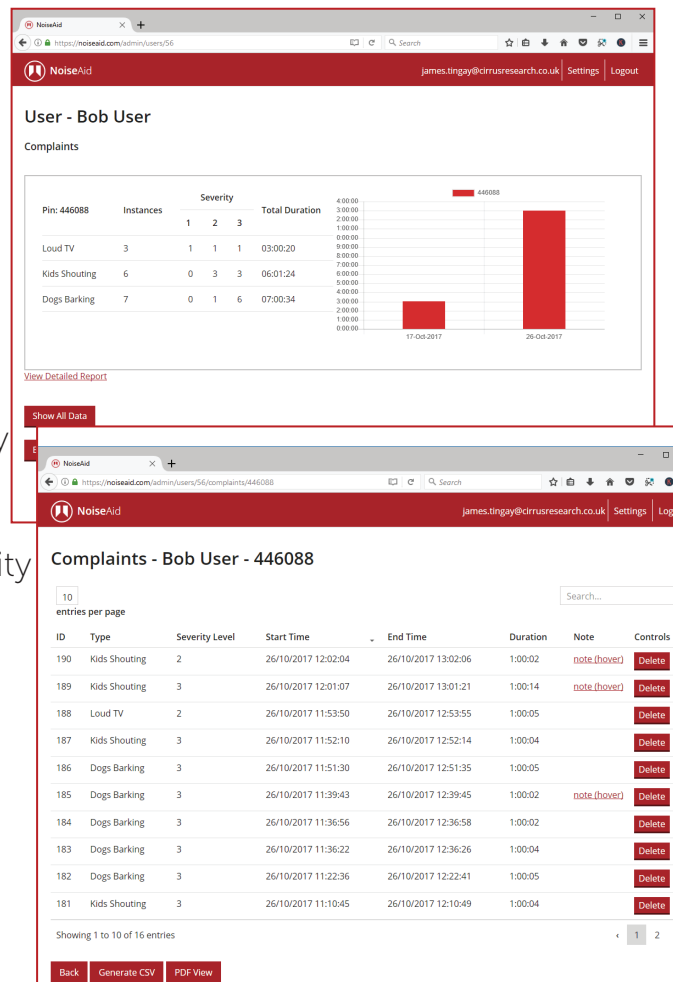

As information is logged by users, it will appear within your secure NoiseAid portal where detailed information can be viewed.

Reports for each user can be created as a PDF for storage in a case management system or exported as a simple CSV for archiving.

NoiseAid is just one part of our complete Noise Nuisance System that includes the **Trojan Noise Nuisance Recorder** and the **NoiseTools** software as well as a range of dedicated support and training products that are exclusive to our Trojan customers.

As a Trojan customer, you have FREE access to NoiseAid with updates and upgrades provided automatically.

For more information about NoiseAid or our Noise Nuisance products just call **0845 230 2434** or email **sales@cirrusresearch.com**

NoiseAid is a web-based application that does not require any software or applications to be installed. The application can be used on any device with a modern web browser (Microsoft Edge, Google Chrome, Firefox, Opera & Safari are recommended) and an internet connection. All information is transferred using an encrypted SSL connection. No user identifiable data is stored on the users device. NoiseAid does not store or record audio - this can be achieved using a Cirrus Trojan Noise Nuisance Recorder.
